

DISEASE RISK ASSESSMENT

Your Pet's Name: _____ Date: _____

We now have a Distemper (FVRCP) vaccine, which provides protection for 3 years. In the past, FVRCP has required annual re-vaccination. The new 3 year vaccine is safe and proven to protect for 3 years. The 1 year vaccine is still available at \$26.25. The 3 year vaccine is \$47.25 (additional charges for Office Call and Examination fee apply for both vaccines).

When vaccinating for Distemper, which vaccine would you prefer your cat to have?

1-Year

3-Year

We recommend Distemper and Rabies vaccines for every cat and the following yearly vaccines based on your cat's exposure to disease:

If your cat has access to the outdoors or places where they have contact with other cats, we recommend the Feline **Leukemia** vaccine. **Feline Leukemia** is an infection which is highly contagious and has no known cure. Each vaccination costs \$36.75 (this does not include the Office Call and 1st year booster).

Would you like your cat vaccinated for **Feline Leukemia** today?

Yes

No

The first year requires two vaccinations, then it is a yearly booster to provide protection against this deadly disease.
